

How to fill in results

Parasites in blood,
virtual microscopy

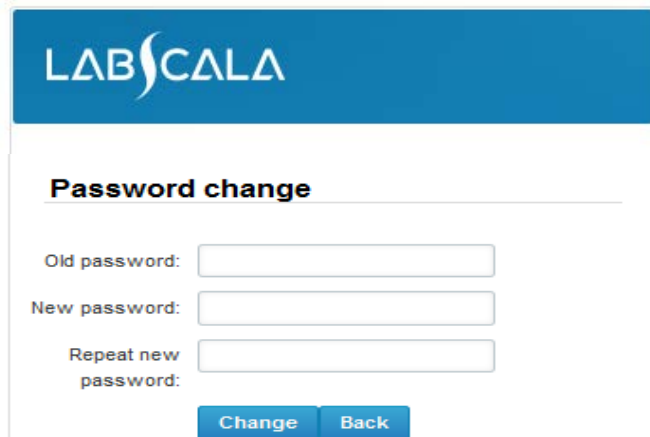

Getting started 1-2-3

The image shows the LabScala login page. At the top is a blue header with the LabScala logo. Below the header, the text "Login with username and password" is displayed. There are two input fields: "Username:" and "Password:". Below the password field is a blue "Login" button and a link "Forgot your password?".

Please make sure that you used five digit client code as username, e.g. 02399!

[Read this before your first login to LabScala!](#)

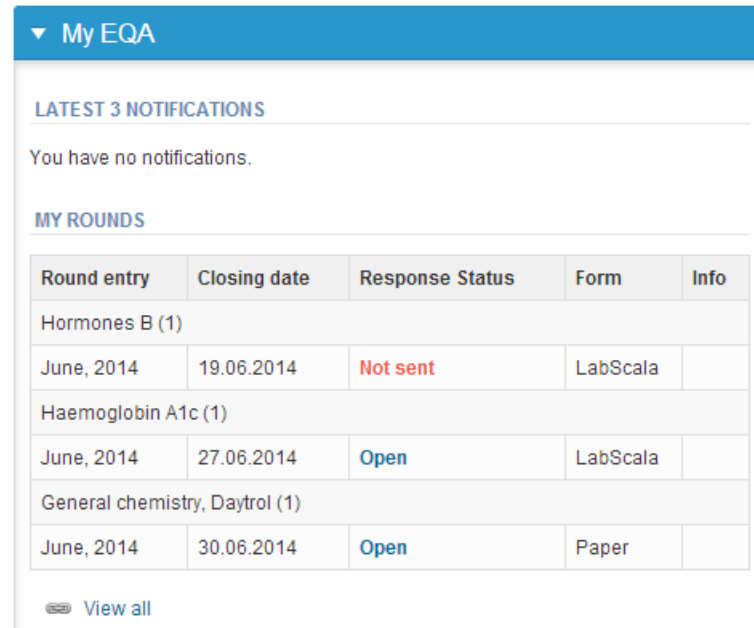

The image shows the LabScala password change page. At the top is a blue header with the LabScala logo. Below the header, the text "Password change" is displayed. There are three input fields: "Old password:", "New password:", and "Repeat new password:". Below the fields are two buttons: "Change" and "Back".

OS5.2

1. Login with your username and password.
2. If you use LabScala for the first time: Login using the existing Mainio (participant services) password
3. Change the password
 - Password needs to have 9 characters, one of which needs to be a letter and one a number
 - This will be your new administrator password
 - If you are already familiar with LabScala, use your own login name and password to access your account
4. Start using LabScala

Filling results

- The easiest way to access open schemes is from "My EQA" on the front page
- In the view of the next 3 closing schemes the closing date and the status of the scheme can be seen
 - **Open** = eForm open for result filling
 - **Not sent** = result filling started but results not sent to Labquality
 - **Accepted** = results sent to Labquality

The screenshot shows a web interface for 'My EQA'. It features a blue header with a dropdown arrow and the text 'My EQA'. Below the header, there are two sections: 'LATEST 3 NOTIFICATIONS' and 'MY ROUNDS'. The 'LATEST 3 NOTIFICATIONS' section contains the text 'You have no notifications.' The 'MY ROUNDS' section contains a table with the following data:

Round entry	Closing date	Response Status	Form	Info
Hormones B (1)				
June, 2014	19.06.2014	Not sent	LabScala	
Haemoglobin A1c (1)				
June, 2014	27.06.2014	Open	LabScala	
General chemistry, Daytrol (1)				
June, 2014	30.06.2014	Open	Paper	

At the bottom of the table, there is a link labeled 'View all' with a small icon to its left.

Filling results

- The eForms can be accessed also from "My Schemes" in the header
 - **Fill results:** access to eForms that are open for result filling
 - **View all:** access to a list of all ordered schemes
 - **Mainio:** other Internet – schemes and e-schemes

Filling results

- After selecting an open scheme the results can be filled
- Result filling is presented as a process:
 - **Request:** Important round-specific information
 - **Instructions:** Printable instruction letter
 - **Pre-analytics:** Sample delivery information
 - **Analytics:** Enter your results
 - **Post-analytics:** Validation of the results (check and save)
 - **Exit:** Back to the front page
- Access to the next step of the process can be done after the previous step is completed

Request

- After opening the scheme the request page is opened with the following information
 - **Product:** here it can be seen what and how many sample sets have been ordered
 - **Delivery:** samples sent from Labquality
 - **Opening:** Result filling /eForm is opened
 - **Closing:** eForm is closed
 - **Status:** status of the scheme (Open, Draft or Accepted)
- Also the scheme specific contact information is filled here
 - The contact persons receive reminders and important scheme-specific information from Labquality
 - **At least one contact person needs to be named!**

Welcome to the survey of Parasites in blood, virtual microscopy, April, 2014 analysis

7695-Parasites in bloo...

Parasites in blood, virtual microscopy 1, 2014

Welcome to the Parasites in faeces, virtual microscopy round 1, 2014.

Specimens:
The original specimens were human thin blood film specimens

Virtual microscopical slides of the specimens are available in the EQA-portal LabScala at our www-pages (www.labquality.fi).

Giemsa stained thin blood films: Specimens **011 and 013.**
MGG stained thin blood films: Specimens **012 and 014.**
(MGG=May-Grünwald-Giemsa)

Clinical details:
Specimen 011 (LQ769514011)
A 43-year-old female returned from Ghana and has now developed high periodic fever with shivers. Diagnosis?

Pre-analytics

- In the Pre-analytics page, the following is asked
 - **Sample arrival date**
 - **Quantity received:** How many sample sets were received
 - **Sample storage condition:** can be left empty
 - **Sample preparation date:** can be left empty
- Comments can be saved if needed
- Move forward by selecting "Save & next"

COMMENTS

We received one extra sample??????

Results

On the Virtual microscopy results -page you have 2 samples with background information and links to the scanned picture of each samples

- Click the blue **View image** button to open the virtual microscopy pictures. The pictures are opened in a new window.
- View and assess the specimen picture.

Note! Check that you have same sample on the virtual microscopy window and result form when you report the findings.

Clinical details: A 27 year old male was visiting family in rural Pakistan and has afterwards been on and off feverish.

Lab examinations showed: CRP 22 mg/l, Hb 143 g/l, Hematocrit 42 %.

[View image](#)

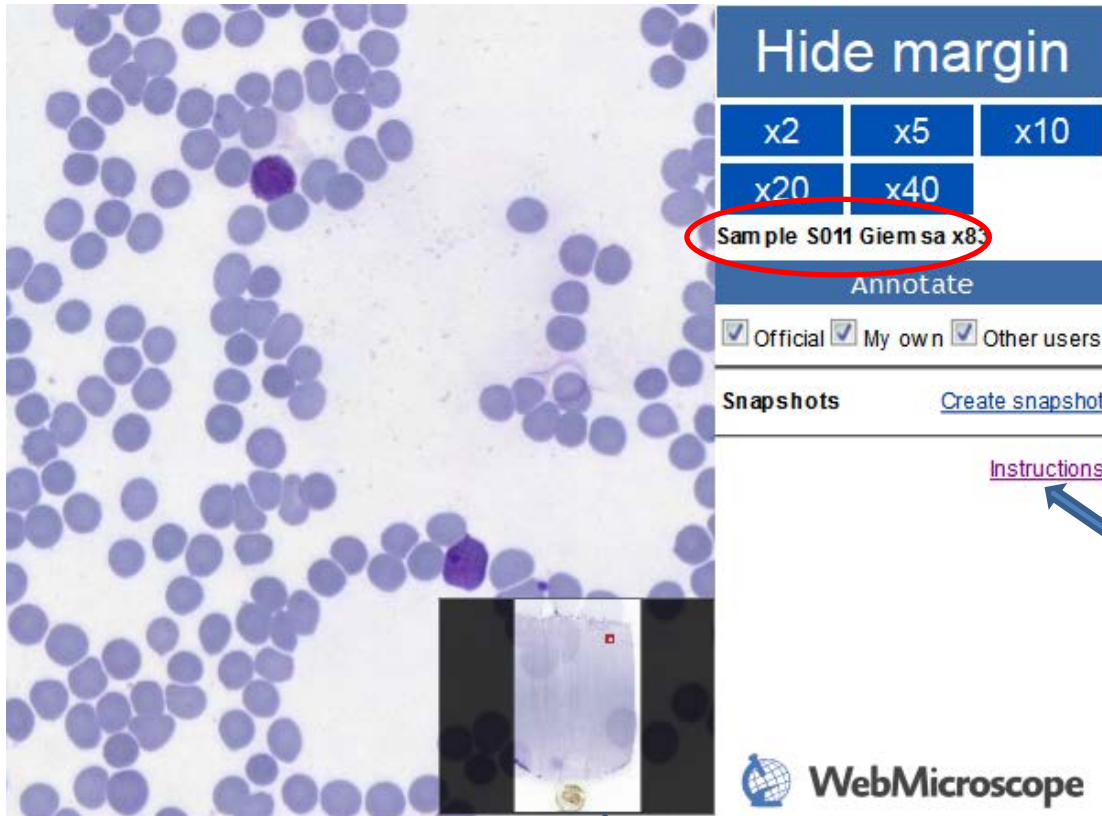

Please click here to open the image and register your findings in the following table.

Slide viewing (WebMicroscope Slide Viewer)

You can zoom in or out with the scroll wheel on your mouse, or by using the zooming controls in the right margin (x2, x5, x10 etc). Alternatively you can use keyboard buttons: + and -. Cursor up, down, left and right will navigate in x/y directions in addition to the mouse control.

Additional instruction you may find under the [Instructions](#) button.

Return to the LabScala window and report your results.

The small picture is an overview panel of the thin blood film specimen.

Estimation of the percentage of parasitaemia in thin blood film

- When calculating the percentage of parasitaemia, count the number of infected red blood cells in 1000 - 2000 red blood cells in a thin blood film.
- A red cell infected with multiple parasites, counts as one parasitised cell.
- Gametocytes are not counted.
- Example: 3 parasitised red cells/100 red blood cells = 3 % parasitaemia.

Results

- There is a place for comments on the bottom of the Results page
- Options for saving on this page are
 - Use "Save as draft", if you don't want to send the results yet
 - Use "Save as final", if you want to send the results to Labquality
- Back to list –button takes you back to the front page
- Clear all page data –button clears all the information on this page

[View image](#) Please click here to open the image and register your findings in the following table.

* Finding	* Lifecycle	% of paracitaemia	Details	Add
<input type="text" value="Suspected, leave a comment"/>	<input style="border: none; background-color: #f0f0f0; padding: 2px 5px;" type="text" value="Other, specify"/>	<input type="text" value="2,0-4,0%"/>	<input type="text" value="P. knowlesi"/>	<input style="border: 1px solid #ccc; background-color: #e0f0ff; padding: 2px 5px;" type="button" value="+"/>

Results

- Report possible findings , lifecycles and % of paracitaemia using the drop down lists.
- **Add each Finding line with the + -button** (you can report several findings /sample).

* Finding	* Lifecycle	% of paracitaemia	Details	Add
<input type="text" value="Negative"/>	<input type="text" value="For blood parasites (all)"/>	<input type="text" value="- Choose -"/>	<input type="text"/>	<input type="button" value="+"/>

- Report the Further handling -action (referred or not).
- Report the name of the performer/ answerer.
- In the end click the green button **Save as final** and close the WebMicroscope Slide Viewer window of this sample.
- Click the **Next** button to move to the next sample.

* Finding	* Lifecycle	% of paracitaemia	Details	Add
Blood parasites, other	Other, specify	2,0-4,0%	P.knowlesi
