

How to fill in results for
Mycoplasma pneumoniae,
antibodies (5980)

Quick guide for result reporting

1. Start from LabScala home page by choosing My Schemes → Fill results → choose correct round.
2. Add Specific Contact, choose Next.
3. Read Instructions, choose Next.
4. Update Sample registration, choose Save & next
5. Reporting results: choose measurement date, test kit and the correct finding for each analyte.
6. Save your results as **Save as final**. Move to next specimen by choosing Next.
7. Validate your results and if needed, update them, finally choose **Accept and send results**.

Result reporting

The screenshot shows the LabScala web application interface. At the top, there is a navigation bar with a home icon and the following menu items: My Orders, My Schemes (circled in red), My Registry, and Administration. Below the navigation bar, a welcome message reads "LabScala welcomes you !". On the right side, there is a "Help" link. The main content area is divided into two panels. The left panel, titled "My EQA", contains sections for "MY REPORTS" (with a link to "Go to Mainio reports"), "LATEST 3 NOTIFICATIONS" (stating "You have no notifications."), and "MY ROUNDS". The "MY ROUNDS" section displays a table with the following data:

Round entry	Closing date	Response Status	Form	Info
Haemoglobin, POC (1)				
November, 4-2014	24.11.2014	Not sent	LabScala	⚠
Clinical cytology (1)				
October, 2-2014	28.11.2014	Not sent	LabScala	⚠
RS virus, detection (1)				
November, 2-2014	02.12.2014	Not sent	LabScala	
Influenza virus A+B, detection (1)				
November, 2-2014	02.12.2014	Not sent	LabScala	
Herpes simplex 1 and 2, antibodies (4)				
November, 4-2014	04.12.2014	Not sent	LabScala	⚠

At the bottom of the "MY ROUNDS" section, there is a "View all" link. The right panel, titled "Shortcuts & messages", contains a "View all messages" link. Two arrows point from the "My Schemes" menu item to the "MY ROUNDS" section and to the first text box. The first text box contains the instruction: "Choose correct EQA round on the front page or by choosing My Schemes and then Fill results". The second text box contains the instruction: "In the view the closing date and the status of the scheme can be seen". Below this, a legend defines the status terms: "Fill results" = eForm open for result filling; "Not sent" = result filling started but results not sent to Labquality; "Sent" = results sent to Labquality.

Choose correct EQA round on the front page or by choosing My Schemes and then Fill results

In the view the closing date and the status of the scheme can be seen

Fill results = eForm open for result filling

Not sent = result filling started but results not sent to Labquality

Sent = results sent to Labquality

From Request to Post-analytics

- After opening the scheme the request page is opened with the following information
 - **Product:** Here it can be seen what and how much has been ordered . **Also the scheme specific contact information is filled here. At least one contact person needs to be named!**
 - **Instructions:** Scheme specific instructions can be read and printed
 - **Pre-analytics:** Specimen arrival date, quantity received, specimen storage conditions etc.
 - **Analytics:** Analyte-specific results can be filled by methods
 - **Postanalytics:** Validate results
 - **Exit:** Back to the front page

Results – how to start

- In this view you can add your results for *Mycoplasma pneumoniae* antibodies
- Result filling is started by selecting the Measurement date
- Mark the measurement date of ***Mycoplasma pneumoniae* ab, specific antibodies** or ***Mycoplasma pneumoniae* ab, total antibodies** depending on which method is in use in your laboratory

Sample S001 Sample S002

▼ Results 1 Add result +

TOTAL ANTIBODIES

* Measurement date	Analyte	* Test	* Test result
03.02.2017 	MypnAb	- Choose - ▼	- Choose ▼

SPECIFIC ANTIBODIES

* Measurement date	Analyte	* Device	* Instrument	* Reagent	Result	Unit	* Interpretation
	MypnAbG						
	MypnAbM						

* Clinical interpretation, specific antibodies	Further action

Results-continues

For **total antibodies**, select your test from drop-down list and add results (positive/negative)

For **specific antibodies** select device, reagent and results and then fill in clinical interpretation for specific antibodies.

Sample S001 | Sample S002

▼ Results 1 Add result +

TOTAL ANTIBODIES

* Measurement date	Analyte	* Test	* Test result
03.02.2017	MypnAb	Serion Complement fixation Test (CFT)	Negative

SPECIFIC ANTIBODIES

* Measurement date	Analyte	* Device	* Instrument	* Reagent	Result	Unit	* Interpretation
03.02.2017	MypnAbG	bio9	Microplate reader	Euroimmun Anti-mycoplasma pneumoniae ELISA IgG	87	EIU	Positive
03.02.2017	MypnAbM	-Choose-					

* Clinical interpretation, specific antibodies

* Clinical interpretation, specific antibodies	Further action
- Choose -	

COMMENTS

• Then select **Save as final** and **Next** and you can add your specimen S002 method and result

Results- continues

Add the measurement date, test and result for specimen S002 for **total antibodies** or measurement date, device, reagent and results for **specific antibodies**. For specific antibodies, also choose clinical interpretation.
