

How to fill in results POCT INR (4335)

Getting started 1-2-3

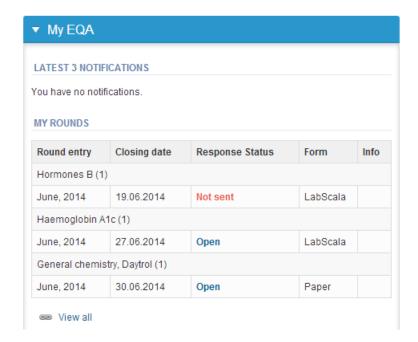

AUTH.01.1

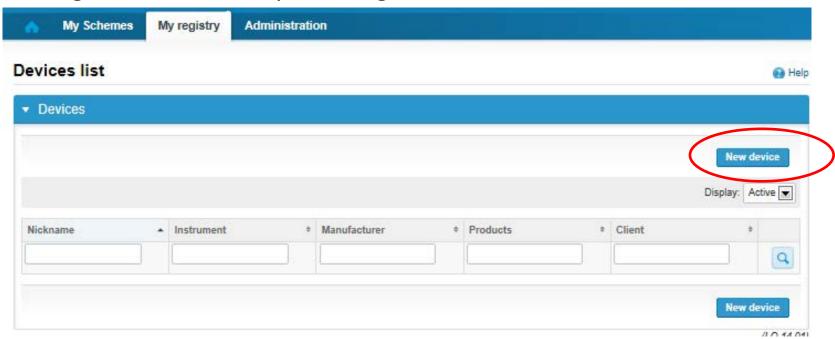

- 1. Login with your username and password.
- 2. If you use LabScala for the first time:
 Login using the existing Mainio
 (participant services) password
- 3. Change the password
 - Password needs to have 9 characters, one of which needs to be a letter and one a number
 - This will be your new administrator password
 - If you are already familiar with LabScala, use your own login name and password to access your account
- 4. Start using LabScala

- The easiest way to access open schemes is from "My EQA" on the front page
- In the view of the next 3
 closing schemes the closing
 date and the status of the
 scheme can be seen
 - Open = eForm open for result filling
 - Not sent= result filling started but results not sent to Labquality
 - Accepted = results sent to Labquality

Own devices

- In your devices list you are able to see all your devices that you have saved in LabScala
- If you have saved no devices, the list is empty
- Adding devices is done by selecting "New device"

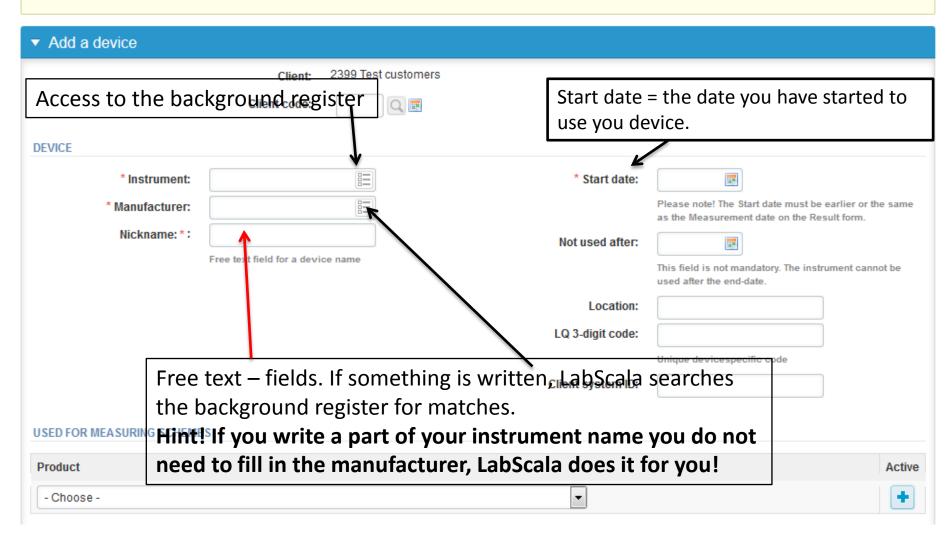

NB! * - marked fields are mandatory!

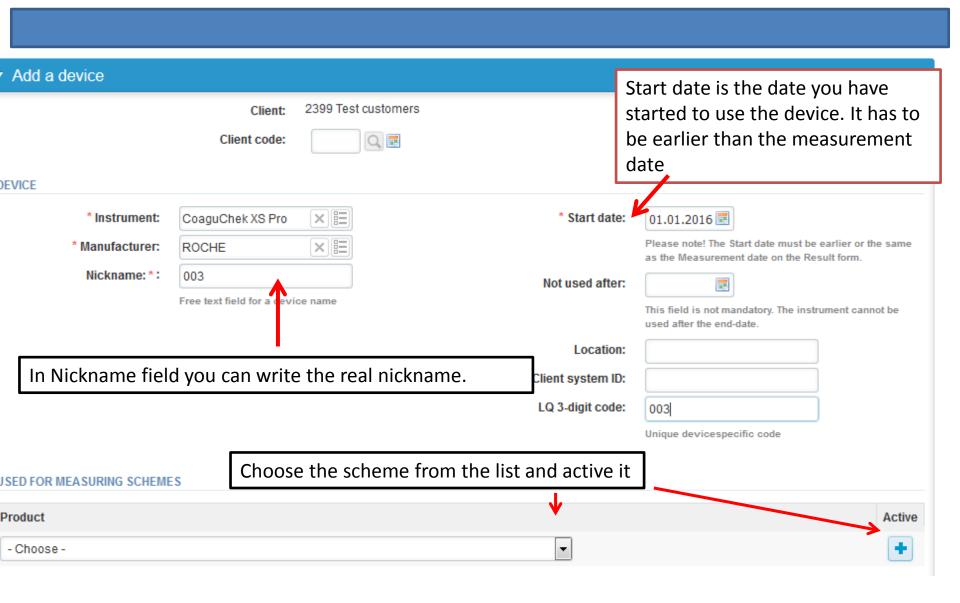

Add a new device

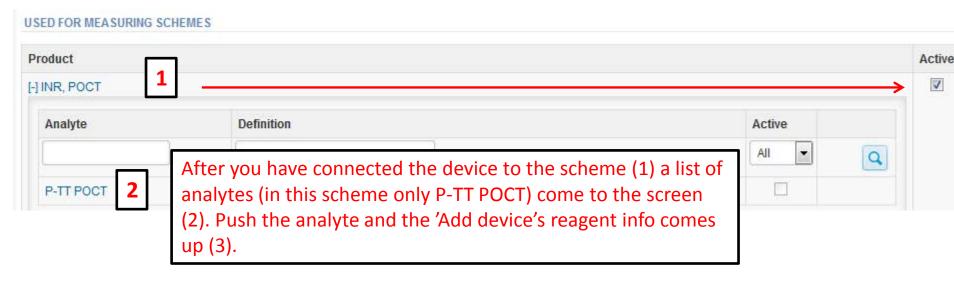

Please note! The Start date must be earlier or the same as the Measurement date on the Result form.

Add new device(2)

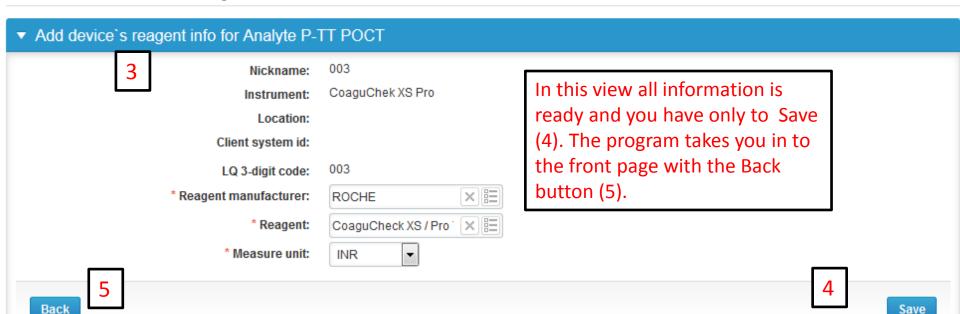

Add new device (3)

👔 LabScala User instructions

Add device's secondary information for test P-TT POCT

- The eForms can be accessed also from "My Schemes" in the header
 - Fill results: access to eForms that are open for result filling
 - View all: access to a list of all ordered schemes
 - Mainio: other Internet –
 schemes and e-schemes

- After selecting an open scheme the results can be filled
- Result filling is presented as a process:
 - Request: Important round-specific information
 - Instructions: Printable instruction letter
 - Pre-analytics: Sample delivery information
 - Analytics: Enter your results
 - Post-analytics: Validation of the results (check and save)
 - Exit: Back to the front page
- Access to the next step of the process can be done after the previous step is completed

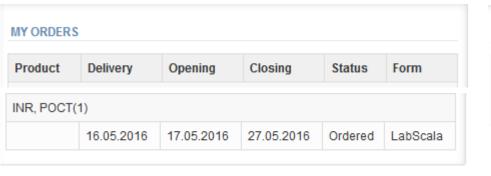

Request

- After opening the scheme the request page is opened with the following information
 - Product: here it can be seen what and how much has been ordered
 - Delivery: samples sent from Labquality
 - Opening: Result filling /eForm is opened
 - Closing: eForm is closed
 - Status: status of the scheme (Open, Draft, Final as before)
- Also the scheme specific contact information is filled here
 - The contact persons receive reminders and important scheme-specific information
 - At least one contact person needs to be named!

POCT-INR

Round 1, 2016

Instructions and result form

16.5.2016

Welcome to this POCT-INR round. This scheme is meant for CoaguCheck and i-Stat meters.

The delivery includes one plasma sample, volume 0.3 mL. It is **ready for use.** The sample must be handled with the same care as patient sample, i.e. as potential transmitter of serious diseases.

Please analyze the sample **immediately** after it has arrived to the laboratory. If this is not possible please store it in the refrigerator (at between +2 and +8°C) and analyze **as soon as possible.**The agreed great has handled with the agree are partially agreed as a post-out-interest formula.

The sample must be handled with the same care as patient sample, i.e. as potential transmitter of serious

diseases.

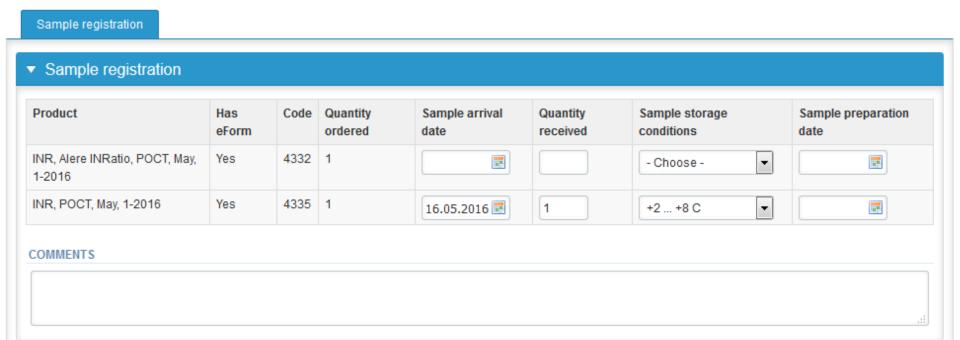

Pre-analytics

- In Pre-analytics, the following is asked
 - Sample arrival date
 - Quantity received: How many sample sets were received
 - Sample storage condition: How have the samples been stored before analysis (refrigerator, room temperature, freezer, other)
 - Sample preparation date: if done, if not, can be left empty
- Comments can be saved if needed
- Move forward by selecting "Save & next"

Prothrombine time, POCT, May, 1-2016 pre-analytics

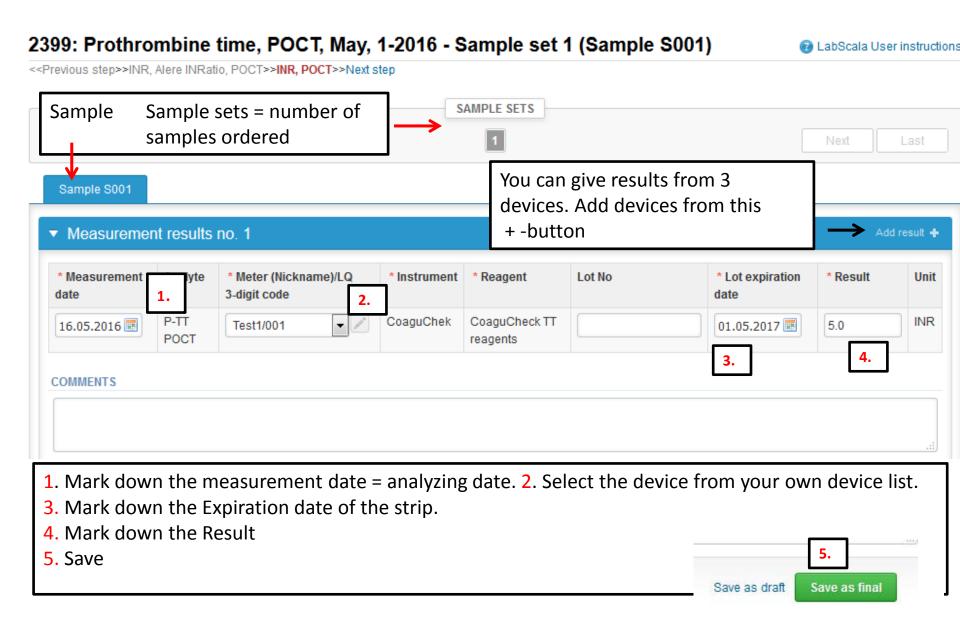

RabScala User instructions

Request>>Instructions>>Pre-analytics>>Analytics>>Post-analytics>>Exit

Results (1)

In Analytics page the results can be filled

Post-analytics (1)

- When all of the results have been filled the user is taken to Post-analytics for result validation
 - Product: what part of the process is being validated
 - Sample set: which sample set is being validated
 - Sample: which sample
 - Errors: if there are analyte-specific validation limit errors these are shown here
 - Last saved: The user who has saved the results
 - Date: date of last saving
 - Status: status of the results (Accepted, Draft, Open, Error)

Post-analytics (2)

- The results can be edited by selecting the correct sample
- When all of the states are such that the results can be sent to Labquality, select "Accept and send results"
- If you wish not to send the results yet, select "Exit"
- The results can be edited as long as the round is open, even if "Accept and send results" has been selected

Prothrombine time, POCT, May, 1-2016 postanalytics
